

#StayHomeHack is a fully remote hackathon helping our society stay connected, productive and healthy

Hundreds of experts from around the world are discovering important problems, sharing resources and finding solutions together. Join us at stayhomehack.com

PROJECT

VIP Party

8 lucky winners join a video chat session with a celebrity, athlete, musician, poet or other public figure as their VIP of choice. The catch? Winners are given only a window of time when the party will start, so they will need to stay at home and wait for their VIP Party to begin.

HOW YOU CAN HELP

1. UI / IxD to assist with product design
2. Frontend / backend developer to support implementing multi-user video chat
3. Funding for design, development, and hosting with bandwidth required

MEET THE TEAM

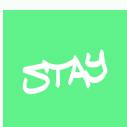

Brian W Reaves

I have 20+ years in digital, largely in usability space. I'm currently a UX practitioner, usability consultant, accessibility advocate, and mentor at local incubator. When I discovered SHH, I was simply looking for a way to give-back, contribute to a solution to help us all.

Hung Do

I am a PhD student in quantum engineering and part-time freelancer in health data science. I joined SHH as a hobby project, to pick up some new tools and trends in the tech world. It's great to feel connected and get to know new people while staying at home.
